PROJECT PROCESS

Throughout our collaboration, we will maintain close communication with our clients. Any questions or concerns will be promptly addressed to ensure the delivery of products that meet and exceed client expectations.

OUR CORE CAPABILITIES

TEMPERED GLASS

A multi-stage advanced polishing process imparts a mirror-like lustre and elegant texture to the display cabinets. Ultra-clear tempered glass maximises the reproduction of the watch's texture and better highlights its sparkle under light, thereby more effectively capturing the consumer's attention.

PAINT

Eco-Friendly Formaldehyde-Free Paint , An environmentally conscious paint meeting international high standards, featuring an even and smooth finish with a delicate texture and brilliant luster.

Security System

Select premium hardware components to elevate the overall quality of the product, ensuring display cabinets combine aesthetic appeal with durability.

Lock
Electronic locks engineered specifically for display cabinets. Tested for 200,000 cycles of switching endurance. Sensor-activated unlocking ensures high security and reliable durability.

Hinge
Hydraulic damping door hinges, silent and smooth operation, uniform opening/closing force, premium 204 stainless steel construction, rust-resistant, durable and oxidation-resistant

Sliding Rails
Concealed track with dual slider design, multi-bearing construction for exceptional stability. High-speed operation, silent performance, corrosion-resistant, and easy replacement.

LED LIGHTS
Special LED spotlights designed for display cases, featuring high brightness without compromising product visibility, extended lifespan, and energy-efficient, eco-friendly operation.

PANEL

Panel materials are carefully selected from premium global sources. We utilize eco-friendly MOF, HOF, recycled wood panels, and PIAOT panels, with formaldehyde content significantly below national standards.
